

CuraMedix Connect

Valuable insights for better clinical and economic outcomes

Greetings!

February here in New England is normally cold, blustery and snowy. As I write this to you, it's 54 degrees outside!

I must admit I'm not happy at all that we've not had a big dumping of snow this winter. Maybe Mother Nature will bless us with one yet...stay tuned.

A few other things you should stay tuned for include AAPSM's upcoming conference "Sports Medicine of the Foot & Ankle at Green Bay." Join us in Green Bay this May to hear and meet esteemed orthopedic surgeon, Dr. Robert Anderson, who also works with the Green Bay Packers' medical team. This event includes hands-on workshops and discussion panels — plus a Lambeau Field Stadium Tour. As one of the lead co-sponsors, we think this event just might rival the Superbowl! Registration details below.

And, to keep you in the know, we've also lined up some great articles for you in this month's newsletter to include: the latest EPAT/ESWT research, ways to grow your referral network and, of course, some ready-to-post social media.

Ready to add EPAT/ESWT to your continuum of care? Let's talk! Give me a call at the number below or [send me an email](#).

All the best,

Elise B. Hamann
Director of Sales and Marketing
