

CuraMedix Connect

Valuable insights for better clinical and economic outcomes

Welcome spring! It's the time of year where your patients are looking to get outside, be active and enjoy the warmer weather. But is pain preventing them from the activities they love?

In this issue, we'll hear stories and takeaways from physicians who use EPAT to help patients dealing with pain. Don't miss great insights from Dr. Sebastian Sinz, who brought EPAT right to the ski slopes of Park City to treat athletes during this year's FIS Snowboard, Freestyle & Freeski World Championships!

You'll also hear from the physicians at Verdant Health, who opened a practice dedicated to regenerative approaches that treat both pain and aesthetic issues. Finally, the CuraMedix team can't wait to share our experiences from the FABI 2019 conference we recently attended in Miami. Happy reading!
